

Product information

Product name: Alphatron EVF-035W-3G

SKU: ALP-EVF-035W-3G

EAN/UCC: 8718591671401

Description

The Alphatron EVF-035W-3G High Definition 3G electronic view finder is equipped with an amazing 960x640 Retina LCD display. This EVF is developed and manufactured by TVLogic and it's a great addition to the existing range of view finders, for any camera operator or DoP.

Thanks to its HD-SDI and HDMI inputs, this view finder can be used with a wide range of cameras. It also has the ability to convert an HDMI input to an HD-SDI output and has no lag. This is a great feature for HDMI-only cameras on productions that require additional monitoring on set.

The view finder has a very strong, lightweight housing and a magnet in the casing for fixating the eye piece when flipped open to directly view the Retina LCD display. The display is sun-protected in case you forget to close the shutter.
